

Soft Close Seat Instructions & Guide

To ensure lasting satisfaction with your Ege Vitrifiye seat, please adhere to the following advice;

- Do not force the seat to the closed position.
- The seat should be cleaned with a soft cloth and warm soapy water or a mild detergent. Dry completely after cleaning.
- Do not use any harsh or abrasive chemicals or products containing chlorine or acids on the seats or the hinges, as this will void the warranty and could cause yellowing or peeling of the material. The toilet seat lid should be left up when chemical agents are used to clean the pan, as vapours from the cleaning agents may attack the surface of the fitting.
- Do not expose the seat to pro-longed direct sunlight.
- Do not stand on the toilet seat or pan.
